STUDIES IN THE PÄLI GRAMMARIANS

II.1

- [A] Buddhaghosa on itthambhūtakkhyāna, itthambhūtalakkhana, accanta-saṃyoga, adhikaraṇa, bhāvalakkhaṇa, karaṇa, nimitta, and samīpa.
- [B] Grammatical References in Paramatthajotikā I–II.
- [C] Mahānāma and Buddhadatta on Grammar.

Introduction

In Studies in the Pāli Grammarians I¹ I have shown that whenever Buddhaghosa refers to grammar or grammarians in support of his analysis of a grammatical or semantical problem in the Pāli, he is referring to Pāninian grammar. This apparently is also the case in those instances where he deals with a number of syntactical problems, without mentioning the source upon which his analysis is based. These analyses constitute a valuable complement to those I have dealt with in the previous article, and I have therefore found it worthwhile to focus on them in this paper, so as to present a more complete picture of Buddhaghosa as a grammarian. Since almost all of the examples occur in identical form in his Atthakathās, I have taken Samantapāsādikā as the primary source, being historically the first among the commentaries allegedly written by Buddhaghosa. In addition, I have dealt with a number of interesting grammatical comments found in Paramatthajotikā I-II, which are both traditionally ascribed to Buddhaghosa, although his authorship has been disputed.² In each case it has been possible to identify the source as Pāninian grammar.

Although the majority of grammatical references in the Pāli. Aṭṭhakathās are found in the writings attributed to Buddhaghosa, he is not the only Buddhist Pāli scholar who occasionally focuses on topics of grammatical interest. In Mahānāma's and Buddhadatta's commentaries on

¹ Cf. Studies in the Pāli Grammarians I, JPTS 1989 pp. 33-81.

² They are probably both post-Buddhaghosa, but historically they cannot be far removed in time from him. Whoever was the actual author of these two Atthakathās [for a discussion of this problem, cf. Norman, *Pāli Literature*, p. 129], internal evidence shows beyond doubt that they were written by the same person since there are several references in Pj II to topics which the author intends to deal with in detail in Pj I [cf., for example, Pj II 136,20: ayam ettha samkhepo, vitthāram pana Mangalasuttavannanāyam (= Pj I 111,6 foll.) vakkhāma]; consequently Pj II must have been written first.

Paţisambidhāmagga and Buddhavaṃsa, respectively, we come across a number of similar references. Since both authors belong to the post-Buddhaghosa generation of Pāli scholars, I have for historical reasons found it interesting to study these references in order to decide whether one can trace, through their grammatical comments, a development toward a distinctively Buddhist Pāli grammatical tradition.

Mahānāma [first half of the 6th century A.D.]³ and Buddhadatta [8th century A.D. ?]⁴ apparently follow Buddhaghosa's example by taking Pāṇinian grammar as their main reference grammar, but in a few interesting cases they deviate from the strict Pāṇinian tradition.

Mahānāma rarely discusses questions of grammar. There are, in fact, only four grammatical references in Paṭis-a, but all of them are interesting. One of them is found in his commentary on the Suññakathā [= Paṭis II 177–84]. Commenting upon the meaning of the word "empty" (suñña), Mahānāma not only refers to grammar (Saddagantha), but also to pramāṇavāda (Nāyagantha). Since this text raises a number of questions that are only remotely connected with the rise of the Pāli grammatical tradition, I have found it appropriate to deal with this text in a separate paper. Another reference seems to indicate that Mahānāma may well have been acquainted with another grammatical source in addition to Pāṇini's Aṣṭâdhyāyī. If so, his source is no doubt identical with Candravyākaraṇa.

In contrast to Mahānāma, Buddhadatta refers more often to the rules of grammar (*lakkhaṇa*). Although his grammatical statements ultimately would seem to derive from Pāṇinian grammar, it is nonetheless clear that in a few cases they reflect a distinctively Buddhist grammatical tradition. This, for instance, is evident in the case where Buddhadatta lays out alternative ways of analysing the word "Buddha". There are indications that his source may

have been identical with Kaccāyana's grammar and the commentarial tradition attached to it. The nature of the grammatical references that occur in the post-Buddhaghosa Pāli. Aṭṭhakathās would thus seem to reflect a wider variety of sources and influences than in the case of Buddhaghosa's grammatical comments.

[A]

1.1 itthambhūtakkhyāna [Sp 111,30–112,3 ad Vin III 1,12–13]

Buddhaghosa only uses the term *itthambhūtakkhyāna* sparingly and almost always in similar contexts. In Sp it occurs twice, the first time in connection with his exegesis of Vin III 1,12-13:

tam kho pana bhagavantam Gotamam evam kalyāno kittisaddo abbhuggato: ...

However, as regards him, the Lord Gotama, the highest praise (kalyāno kittisaddo) was spread (abbhuggato) in the following words (evam): ...

On this clause Buddhaghosa writes the following comment:

tam kho panā ti itthambhūtakkhyānatthe upayogavacanam: tassa kho pana bhoto Gotamassā ti attho.⁷

[In the clause] "however, as regards him, [etc.,]" the accusative is used in the sense of a statement of circumstance. The meaning is "however, with respect to him, the lord Gotama."

The question with which Buddhaghosa deals here is the function of the preposition *abhi* [in *abbhuggata*] when it is used as a *karmapravacanīya* [= Pāli *kammapavacanīya*],8 i.e., a preposition used independently of an

³ Cf. Norman, *Pāli Lit.*, p. 132.

⁴ The date of Buddhadatta has not yet been fixed definitively. He may belong to the period after Dhammapāla, to whose Vv-a he appears to refer. Cf. Norman, *Pāli Lit.*, p. 146.

⁵ The reference to saddavidū at Paṭis-a 645,3 [qu. Nidd-a 293,22] is not a genuine grammatical reference like some of those found in Buddhaghosa's writings [cf. Studies in the Pāli Grammarians I], being a mere gloss on the term mahaddhano. It has not been possible to identify Mahānāma's source, but it is probably not wrong to assume that he draws his information from a Pāli kośa. The passage reads: dhanavā ti pasansitabbapaññādhanavattā niccayuttapaññādhanavattā atisayabhūtapaññādhanavattā dhanavā. etesu tīsu atthesu idam vacanam saddavidū icchanti. In one place [v. Paṭis-a 569,19] he deals with a grammatical problem: the interpretation of the compound vimokkhamukha, which he interprets as a karmadhūraya, without referring to any grammatical source.

⁶ Cf. Mahānāma on the Interpretation of Emptiness (forthcoming).

 $^{^7}$ For identical analyses, cf. Ps II 327,34 (ad M I 285,8); Mp II 286,22 (ad A I 180,20); Pj II 441,2 (ad Sn 103,6).

⁸ For this technical term, cf. Renou, *Terminologie*, s.v.

explicit verb form, which is to be complemented from the context. Pāṇini deals with these particles in Pāṇ I 4 83 foll. In Pāṇ I 4 [90+] 91, which is the sūtra Buddhaghosa has in mind, he describes the function of *abhi* as a *karmapravacanīya*: *abhir abhāge*: "*abhi*" [is a *karmapravacanīya* used in the sense of a sign (i.e., "in the direction of"), a statement of circumstance (i.e., "as regards; with respect to"), and of distribution (i.e., "separately; one after another")] but not in the sense of division.

According to Pāṇini such karmapravacanīyas are regularly constructed with the accusative [cf. Pāṇ II 3 8: karmapravacanīyayukte dvitīyā]. In Pāli the usage differs from Sanskrit since abbhuggacchati is constructed both with acc. and gen. in analogous contexts [v. CPD s.v. abbhuggacchati]. The construction with the gen. is no doubt reflected in Buddhaghosa's paraphrase, which in addition conveys the particular semantic value of abhi when used in the sense of itthambhūtakkhyāna.9

It is, of course, questionable whether the Paninian description of the category of karmapravacaniya is applicable to Pāli abbhuggacchati as suggested by Buddhaghosa. As a matter of fact, there is no clear case of a karmapravacanīya in Pāli. The verb abbhuggacchati is rather to be interpreted as a regular verbal compound with two upasargas, as indicated by the sandhi. The particle abhi therefore has no independent syntactical function in the same way that a karmapravacaniya is supposed to have according to the Pāninian definition. That which suggested to Buddhaghosa to interpret abhi as a karmapravacaniya and to take it in the sense of itthambhūtakkhyāna was no doubt the fact that in this particular case, which represents an old canonical stereotype, the verb abbhuggacchati is constructed with the acc. However, as mentioned before, there are several instances in canonical Pāli where it is constructed with the gen. This shows clearly that we are dealing with a regularly compounded verb that optionally may be constructed with the acc. or the gen. This represents a peculiarity of the Pāli, for which there is no parallel in Sanskrit. It is therefore justified to conclude that the linguistic category of karmapravacanīya in its Pāninian form is obsolete in Pāli.10

Both Vjb [Be 1960 38,4–7] and Sp-t [Be 1960 I 214,19–215,11] comment upon Buddhaghosa's explanation. Sāriputta's lengthy exegesis in Sp-t, which he illustrates with examples quoted from either Candravrtti ad Candra II 1 54 or the Kāśikā ad Pāṇ I 4 91, displays his usual mastery of grammatical issues and thus confirms the Pāṇinian background of Buddhaghosa's analysis. ¹¹ Kacc-v ad Kacc 301 [= Sadd 586] quotes the example upon which Buddhaghosa comments, and adds another example taken from D II 30,11: pabbajitaṃ anu pabbajjiṃsu, that is analogous to the clauses at Bv II 47 and Bv XX 5, with which Buddhadatta deals in his commentary ad loc. [v. infra].

[Sp 622,11-12 ad Vin III 181,3-4]

Buddhaghosa's reference to itthambhūtakkhyāna in this case is clearly a slip of the pen for itthambhūtalakkhaṇa [on which v. infra], which the context shows that he must have had in mind. This assumption is confirmed by the fact that in Sp he defines a similar usage, with reference to itthambhūtalakkhaṇa. The syntactical problem with which he deals in his comment is a series of instrumental forms that occur in the following sentence: atha kho so bhikkhu ... Kiṭāgirim piṇḍāya pāvisi pāsādikena abhikkantena paṭikantena ālokitena vilokitena sammiñjitena pasāritena okkhittacakkhu iriyāpathasampanno. After having commented on the meaning of each instrumental form, he concludes: sabbattha itthambhūtakkhyānatthe karaṇavacanaṃ: in all [the above-mentioned cases] the instrumental is used in the sense of a statement of circumstances [correct

⁹ Buddhaghosa apparently never comments upon those instances where *abbhuggacchati* is constructed with the genitive. This situation is typical of the way in which he applies his knowledge of Sanskrit grammar to clarify grammatical features of the Pāli: he seems to consciously avoid dealing with those instances which contradict Sanskrit usage as defined by Pānini.

¹⁰ For an analogous example of the usage of the category of *karmapravacanīya* for exegetical purposes, cf. Buddhadatta's analysis of *anupabajjati* ad Bv XX 5, q.v. infra.

¹¹ Because of its intrinsic interest I quote the relevant part of Sāriputta's tīkā: "itthambhūtakkhyānatthe upayogavacanan" ti ittham imam pakāram bhūto āpanno to itthambhūto. tassākhyānam itthambhūtakkhyānam so yeva attho itthambhūtakkhyānattho. athavā ittham evam pakāro bhūto jāto ti evam kathanattho itthambhūtakkhyānattho. tasmim upayogavacanan ti attho. ettha ca "abbhuggato" ti ettha abhisaddo itthambhūtakkhyānatthajotako abhibhavitvā uggamanappakārassa dīpanato. tena yogato "tam kho pana bhavantam Gotaman" ti idam upayogavacanam sāmiatthe visamānam itthambhūtakkhyānadīpanato itthambhūtakkhyānatthe ti vuttam. ten' evâha: "tassa kho pana bhoto Gotamassā" ti attho ti. idam vuttam hoti: yathā sādhu Devadatto mātaram abhī [= sādhur Devadatta mātaram abhi, Candravṛtti ad Candra II 1 54 and Kāś ad Pāṇ I 4 91] ti attho abhisaddayogato itthambhūtakkhyāne upayogavacanam katam. evam idhāpi tam kho pana bhavantam gotamam abhi evam kalyāno kittisaddo uggato ti abhisaddayogato itthambhūtakkhyāne upayogavacanan ti, Sp-t I 214,19 foll.

¹² Cf. Sp 974,31.

to read *itthambhūtalakkhaņe*: in the sense of an indication of a particular state or condition].

Although the usage of the instr. case is clearly modal in this case, the very fact that we are dealing with instrumental forms excludes the existence of the category of karmapravacaniya, of which itthambhūtâkhyāna is a subset, being constructed with the acc. The corresponding modal usage of the instrumental is denoted itthambhūtalakṣaṇa in Pāṇini's technical vocabulary [cf. Pāṇ II 3 21 and v. infra]. And this usage is the subject of the following discussion.

1.2 itthambhūtalakkhana [Sp 891,8-9 ad Vin IV 187,4]

In this example Buddhaghosa is concerned with a particular usage of the instrumental case. The vinaya text on which he comments is the following: na ukkhittakāya antaraghare gamissāmī ti: "I shall not walk between the houses with [the robe] lifted up," on which he writes the following concise comment:

ukkhittakāyā ti ukkhepena, itthambhūtalakkhane karanavacanam.

[The expression] "with [the robe] lifted up" means "by lifting up [the robe]." The instrumental (*karaṇavacanam*) is used in the sense of an indication of [someone or something being in] this or that state or condition.

This exegesis presupposes Pāṇ II 3 [18+] 21 which gives a concise definition of the modal usage of the instrumental: *itthaṃbhūtalakṣaṇe*: [The third case, i.e., the instrumental case] is used in the sense of an indication of [someone or something being in] this or that state or condition. Buddhaghosa's identification of this particular usage of the instrumental is precise and to the point because, from a syntactical point of view, there is complete agreement between Sanskrit and Pāli usage in this case.

1.3 accantasamyoga [Sp 107, 27-31 ad Vin III 1,6]

The technical term accantasamyoga is rarely found in Buddhaghosa's Atthakathās. It is, however, an inseparable part of his elaborate discussion—reproduced, with minor changes according to the context, in his commentaries on the nikāyas—of the case syntax and meaning of the word samaya, which throughout the canonical literature is used either in the accusative, the instrumental or the locative. In this context Buddhaghosa addresses the usage of samaya in the accusative. The relevant passage reads:

katham suttante tāva accantasamyogattho sambhavati? yam hi samayam bhagavā Brahmajālâdīni suttantāni desesi accantam eva tam samayam karunāvihārena vihāsi, tasmā tadatthajotanattham tattha upayoganiddeso kato. 13

How can it be that it is first of all $(t\bar{a}va)$ in the sutta(s) that the meaning of uninterrupted connection (accantasamyoga) [in time] occurs? Because (hi) Bhagavan, during the time (samayam) when he taught suttas such as Brahmajāla, uninterruptedly $(accantam)^{14}$ remained in a state of compassion, $(tasm\bar{a})$ the specification [of circumstances] in them (tattha) is put (kato) in the accusative (upayoganiddesa) in order to make this meaning clear.

According to a quotation from the $por\bar{a}nas$ [= $atthakath\hat{a}cariy\bar{a}s$] which Buddhaghosa invariably quotes in this context, it makes no difference if samaya is put in the acc., instr. or loc. 15 since the meaning is locatival in any case. There is therefore good cause to believe that Buddhaghosa's elaborate exegesis represents a later attempt to relate the usage of the word samaya, in acc., instr., and loc., to distinct syntactical categories as defined by Pāṇinian grammar, while at the same time attempting to interpret a purely grammatical problem in the context of Buddhist hermeneutics.

 $^{^{13}}$ The same text occurs also, with minor changes, at Sv I 33,23–25; Ps I 9,26–29; Spk I 11,28–31; Mp I 13,20–23.

¹⁴ Cf. Sp-t Be 1903 I 188,5–7: accantam evā ti ārambhato paṭṭhāya yāva desanāniṭṭhānam tāva accantam eva: nirantaram evā ti; Vjb Be 1960 34,26–27.

¹⁵ For a translation of this quotation, v. Studies in the Pāli Grammarians I, p. 36.

183

It is, of course, not possible to decide whether Buddhaghosa himself is responsible for this attempt, or whether his analysis merely reflects contemporary Theravāda exegesis. In any case, the context in which the above passage occurs — it represents one of the most complex sections of Buddhaghosa's Aṭṭhakathās — displays considerable knowledge of Pāṇinian grammar. 16 For instance, his usage of the term accantasaṃyoga [= Sanskrit atyantasaṃyoga] for explaining the usage of taṃ samayaṃ is dependent on Pāṇ II 3 [2+] 5, which defines this particular usage of the acc. as follows: kālâdhvanor atyantasaṃyoge: [The second case, i.e., the acc. is used] after [words expressing] temporal or spatial extension, when [the sense is] uninterrupted connection [in time or space].

1.4 adhikarana and bhāvalakkhana [Sp 107,31–108,5 ad Vin III 1,6]

This text is, like the one analysed above [v. supra 1.3], part of Buddhaghosa's exegesis of the syntax of the word *samaya*. This time he deals with the locative:

A bhidhamme ca adhikaranattho bhāvena bhāvalakkhanattho ca sambhavati. [so punctuate] adhikaranam hi kālattho samūhattho ca samayo tattha vuttānam phassâdidhammānam khanasamavāyahetusankhātassa ca samayassa bhāvena tesam bhāvo lakkhīyati, tasmā tadatthajotanattham tattha bhummavacanena niddeso kato. 17

In the Abhidhamma [the word "samaya"] occurs with the meaning of locus (adhikaranattho) and with the meaning of qualification of [one] action through [another] action (bhāvena bhāvalakkhanattho). Because (hi) the locus (adhikaranam) is

the occasion in the sense of the time and collection of the dhammas as explained therein [i.e. in the Abhidhamma] like, e.g. touch (phassâdidhammānam), and because their action is qualified through the action of the occasion which is denoted moment, combination, and cause (khaṇasamavāyahetusaṅkhātassa ca samayassa bhāvena), 18 (tasmā) the specification [of circumstances] is made therein [i.e. in the Abhidhamma] in the locative. 19

In order to understand the scope of Buddhaghosa's rather complex exegesis, it is necessary to know the grammatical background of his argument. Buddhaghosa takes his point of departure in two well-known functions of the locative as defined by Pāṇini. The basic usage of the loc. is to denote any given locus (adhikaraṇa) of an action. Pāṇini defines this locus in Pāṇ I 4 45 in terms of being the support or substratum (ādhāra) of an action: ādhāro 'dhikaraṇaṃ. 20 Another syntactical function of the locative is the so-called absolute locative. Pāṇini describes this usage in Pāṇ II 3 [+36] 37: yasya ca bhāvena bhāvalakṣaṇam: moreover, the thing, due to whose action some other action is qualified, stands in [the seventh case, i.e. the locative]. Buddhaghosa's technical vocabulary, as it appears from his exegesis, is completely identical with Pāṇini's. He even seems to quote Pāṇ II 3 37 in a slightly edited Pāli version. 21

The canonical Abhidhamma passage, which Buddhaghosa interprets in the light of Pāṇinian grammar, is Dhs § 1, defining the particular occasion (samaya) on which certain dhammas are to be considered good (kusala). I quote only the part that is necessary for understanding Buddhaghosa's interpretation:

therefore omitted by Buddhaghosa.

¹⁶ For another part of the same section, cf. the analysis of the text on *adhikarana* and *bhāvalakkhana*, q.v. infra.

¹⁷ The same text occurs with minor changes at Sv I 33,10-15; Ps I 9,14-19; Spk I 11,15-21; Mp I 13,7-13; cf. As 61,27-32 [one does not usually find statements with grammatical implications in As]: adhikaraṇam hi kālasankhāto samūhasankhāto samayo tattha vuttadhammānan ti adhikaraṇavasen' ettha bhummam. khaṇasamavāyahetusankhātassa ca samayassa bhāvena tesam bhāvo lakkhīyatī ti bhāvena bhāvalakkhaṇavasen' ettha bhummam. The whole passage looks very much like a grammatical afterthought added as a note to the otherwise detailed exegesis of Dhs § 1, to which also Buddhaghosa's exegesis relates. The passage is perhaps a slightly edited quotation from Buddhaghosa.

 $^{^{18}}$ Cf. the verse — probably stemming from an unknown Pāli kośa — which Buddhaghosa quotes in Sp 107,1–2:

samavāye khaņe kāle samūhe hetudiṭṭhisu paṭilābhe pahāne ca paṭivedhe ca dissati.

¹⁹ In his translation of the same passage, as quoted in Pj I, Bhikkhu Ñāṇamoli takes *bhāva* to mean substantive, and thus misinterprets the issue under discussion; cf. Pj I-trsl. (*Illustrator*) p. 114.

²⁰ Cf. Dhammapāla's Ud-a 22,5–8 which quotes Buddhaghosa's explanation interspersed with glosses: A bhidhamme ... ādhārabhāvasankhāto [so read; Ee ādhārassa visayasankhāto] adhikaranattho. kiriyāya kiriyantaralakkhanasankhātena bhāvena bhāvalakkhanattho ca sambhavati; cf. also Dhammapāla's Sv-pṭ qu. n. 23 infra, which alludes to this Pāṇini sūtra. ²¹ The yasya ca of II 3 37 only makes sense in connection with the preceding sūtra and was

yasmim samaye kāmâvacaram kusalam cittam uppannam hoti ... tasmim samaye phasso hoti, vedanā hoti, saññā hoti, cetanā hoti ...: ime dhammā kusalā.

On which occasion (yasmim samaye) a good thought that is active within the sphere of the sensuous universe, has originated ... on this occasion (tasmim samaye) there is contact, feeling, perception, volition ...: these dhammas are good.

According to Buddhaghosa there are two ideas underlying the usage of the locatives yasmim samaye ... tasmim samaye. One is that the word samaya denotes the locus (adhikarana) of action, in terms of a particular time (kālattha) and a particular collection (samūhattha) being the basis of the action, of certain dhammas [= phassa, vedanā, saññā, cetanā, etc.]. The implied action is in this particular case expressed through the two verbs uppannam (hoti) and hoti. This is the strict locatival interpretation of samaya. It is understandable that time, as such, should be interpreted as the locus of an action. It is less obvious how a collection of certain dhammas [i.e. conditions] could be taken, in a strict locatival sense, as the locus of an action. It would seem more straightforward to interpret this usage of the loc. in the sense of the aggregate being the cause [= nimittasaptami] of the existence of other dhammas. The strict locatival interpretation would thus seem to be somewhat forced. However, when Buddhaghosa takes samaya in the sense of time $(k\bar{a}la)$ and a collection $(sam\bar{u}ha)$ [of dhammas], he draws on a tradition which is reflected in the verse defining the various meanings of samaya, which he quotes whenever he deals with the word samaya.²²

The other function which Buddhaghosa attributes to the locative is more difficult to understand, because it is far from obvious how one could possibly interpret the grammatical structure of yasmim samaye ... uppannam hoti ... tasmim samaye ... hoti according to the Pāṇinian definition of the locativus absolutus.

The phrase samayassa bhāvena [cf. Sp 108,4 qu. above], however, gives a clue to what Buddhaghosa had in mind. The underlying idea is — as Dhammapāla explains in a similar context in Sv-pṭ, illustrating the syntactical properties of the absolute locative with a citation, in Pāli transla-

tion, from Candravrtti [ad Candra II 1 90] or the Kāśikā [ad Pān II 3 37]²³ that one should complement the locative phrases yasmim samaye ... tasmim samaye with the appropriate form of the pr. part. sat so as to read yasmim samaye sati ... tasmim samaye sati. The reason is that the verb hoti in the phrase uppannam hoti [q.v. supra] necessitates the complementation of existence (sattā) to samaya (hotipadatthassa sattāvirahâbhāvato) so as to form a regular absolute locative. In other words, the action of the origination of the mind (cittassa uppādakiriyā) and the action of the coming into existence of contact, etc. (phassâdīnam bhavanakiriyā) are both qualified by the existence of the occasion (samayassa sattākiriyāya ... lakkhīyati). Dhammapāla's explanation thus gives a clear exposition of the idea underlying Buddhaghosa's application of the Pāninian definition of the locativus absolutus to the phrases yasmim samaye ... tasmim samaye. The three meanings of moment, combination, and cause (khana, samavāya, and hetu) which he ascribes to samaya are, in this case as well, related to the verse mentioned above, in which the various meanings of the word samaya are defined.

1.5 *karaṇa* and *hetu* [Sp 108,5–11 ad Vin III 1,6]

This text continues the exegesis of the phrase tena samayena, as it occurs in Vin III 1,6. Buddhaghosa writes:

²² Cf. the verse quoted above and v. the detailed exegesis at As 61,27–32 which clarifies the intention underlying Buddaghosa's concise explanation.

²³ Cf. his elaborate commentary at Sv-pt I 58,30 foll.: adhikaraṇattho = ādhārattho. bhāva nāmo kiriyā, kiriyāya kiriyantaralakkhanam = bhāvena bhāvalakkhanam. yathā kālo sabhāvadhammaparichinno sayam paramatthato avijjamāno pi ādhārabhāvena pannāto tankhanappavattānam tato pubbe parato ca abhāvato: pubbanhe jāto, sāyanhe gacchatī ti ca ādisu, samūho ca avayavavinimmutto avijjamāno pi kappanāmattasiddho avayavānam ādhārabhāvena paňňāpīyati: rukkhe sākhā, yavarāsiyam sambhūto ti ādisu; evam idhâpī ti dassento āha "adhikaraṇam hi ... dhammānan" ti. yasmim kāle dhammapuñje vā kāmâvacaram kusalam cittam uppannam hoti, tasmim yeva kāle dhammapunje vā [so read; Ee va] phassâdayo pi hontī ti ayam hi tattha attho. yathā ca "gāvīsu duyhamānāsu gato, duddhāsu āgato" [= Candravṛṭṭi ad Candra II 1 90 and Kāś ad Pāṇ II 2 37] ti dohanakiriyāya gamanakiriyā lakkhīyati, evam idhâpi: yasmim samaye, tasmim samaye ti ca vutte satī ti ayam attho viññāyamāno eva hotipadatthassa [so read; Ee hoti padatthassa] sattāvirahâbhāvato ti samayassa sattākiriyāya [so read; Ee sattā kiriyāya] cittassa uppādakiriyā phassâdīnam bhavanakiriyā ca lakkhīyati. yasmim samaye ti yasmim navame khane, yasmim yonisomanasikārâdihetumhi paccayasamavāye vā sati kāmâvacaram kusalam cittam uppannam hoti, tasmim yeva khane, hetumhi, paccayasamavāye ca phassâdayo pi honti ti ubhayattha samayasaddena [so read with v.l.; Ee -sadde] bhummaniddeso kato lakkhanabhūtabhāvayutto ti dassento āha: khana-... lakkhīvatī ti.

idha pana hetuattho karanattho ca sambhavati. yo hi so sikkhāpadapañňattisamayo Sāriputtâdīhi pi dubbiňňeyyo, tena samayena hetubhūtena karanabhūtena ca sikkhāpadāni paññāpayanto sikkhāpadapaññattihetuñ ca avekkhamāno bhagavā tattha tattha vihāsi, tasmā tadatthajotanattham idha karanavacanena niddeso kato ti veditabbo.²⁴

In this context [i.e., in the context of the Vinaya], however, [the word "samaya"] occurs with the meaning of cause and with the meaning of instrument. Because (hi) the occasion for [Bhagavan's] discoursing on the precepts was difficult to understand even for Sāriputta, etc., [and because] Bhagavan, while setting forth, through that [specific] occasion as a cause and an instrument (hetubhūtena karanabhūtena), the precepts and paying attention to the cause for discoursing on the precepts, lived in this or that [place], $(tasm\bar{a})$ one should know that the indication [of circumstances] in this context [i.e., in the context of the Vinaya] is made by [using] the instrumental case (karanavacanena).

There is no grammatical subtlety involved in this comment. Buddhaghosa's terminology shows that he has in mind Pānini's definitions of the usage of the instrument kāraka, in Pān II 3 18: kartrkaranayoh trtīyā, and II 3 23: hetau. In these sūtras Pānini explains that the instrument kāraka is used in the sense of an instrument or a cause of something. The identification of the relevant Pāṇini sūtras is corroborated by Buddhaghosa's usage of the terms hetubhūta and karanabhūta.

It is noteworthy that some of the examples which Sariputta and Dhammapāla quote in their respective commentaries on Buddhaghosa's text appear to be quoted from Candragomin's commentary on his grammar. This commentary was evidently used by the authors of the Kāśikā, which in many cases is indistinguishable from Candravrtti.²⁵

1.6 nimitta [Sp 189,7-28 ad Vin III 8,30-33]

The Vinaya passage which Buddhaghosa attempts to interpret is syntactically ambiguous and difficult to construe. This fact leads him to suggest two alternative solutions to the problem, neither of which, however, is satisfactory. The passage reads:

tatra sudam Sariputta bhimsanakassa vanasandassa bhimsanakatasmim hoti yo koci avîtarāgo tam vanasandam pavisati yebhuyyena lomāni hamsanti.

The syntax of this sentence raises several problems of interpretation. It is, in the first place, not clear how we are to construe tatra. Buddhaghosa suggests that it be taken as an anaphora, referring back to what has been said in the previous sentence (tatrā ti purimavacanâpekkham). He interprets sudam as an expletive particle (sudan ti padapūranamatte nipāto), and construes the sentence as follows (ayam pan' ettha atthayojanā):

tatrā ti yam vuttam aññatarasmim bhimsanake vanasande ti. tatra yo so bhimsanako ti vanasando vutto tassa bhimsanakassa vanasandassa bhimsanakatasmim hoti, bhimsanakiriyāya hotī ti attho. kim hoti? idam hoti; yo koci ... lomāni ham santī ti.

The expression "therein (tatra)" [refers back to the clause] "in a horrifying jungle-thicket [= Vin III 8,23]." In this case the jungle-thicket is explained (vutto) by the word "horrifying (bhimsako)." It happens (hoti), on account of this horrifying jungle-thicket's creating horror (bhimsanakassa vanasandassa bhimsanakatasmim), that ..., i.e. (iti attho), it happens, because of its action of [creating] horror (bhimsanakiriyāya), that ... What happens ? It happens that whoever enters this jungle-thicket without being devoid of passion, [his] hair as a rule stands on end (hamsanti).

²⁴ An expanded version of the same text is found at Ud-a 23,3–11.

²⁵ Cf. annena vasati vijjāya vasatī ti ādīsu viya hetuattho. pharasunā chindati. kuddālena khanatī ti ādīsu viya karanattho ca sambhavati [Sp-t Be 1903 I p. 186,27-28] ≠ Dhammapāla Sv-t I 559,23-24 [cf. Ud-a 22,32-23,3]. These examples are partly identical with Candravrtti ad Candra II 1 68: hetau: ... annena vasati. vidyayā yaśah [cf. Kāś ad Pān II 3 23: dhanena kulam. kanyayā śokah. vidyayā yaśah; for Sv-t ajjhena vasati, read vijjāya vasati] and 63: karane: ... dātrena lunāti, parasunā chinatti [= Kāś ad Pān II 3 18]. Note that the examples

pharasunā chindati and kuddālena khanati have a parallel in Kacc-v ad Kacc 281: yena vā kariyate tam karanam: ... pharasunā rukkham chindati. kuddālena rukkham khanati.

From this exegetical tour de force it becomes clear that Buddhaghosa interprets bhimsanakatasmim as a compound, which he apparently derives from bhimsana + kata. According to Sāriputta, kata (n.) is to be interpreted as an action noun $(bh\bar{a}vas\bar{a}dhana)$, 26 but apart from that he makes no suggestion for the derivation of kata, about which Buddhaghosa also leaves us in the dark. The gloss $bhimsanakiriy\bar{a}ya$, however, would seem to indicate that he took kata as a pp. $[<\sqrt{kr}]$, and that he interpreted it as a neuter noun, equivalent to $kiriy\bar{a}$ in the compound $bhimsanakiriy\bar{a}$. As indicated by Buddhaghosa's gloss, he interpreted the locative in a causal sense $(nimitta = nimittasaptam\bar{i})$.

In the second alternative he returns more explicitly to this interpretation of the locative. First he suggests taking the locatival *tatra* in the sense of the genitive (*tatrā ti sāmiatthe bhummam*). He interprets *sudam* as a sandhi form of the particle (*nipāta*) *su* and the pronoun *idam*, with elision of the *-i-* (*sandhivasena ikāralopo veditabbo*), and he finally construes the sentence as follows (*ayam pan' ettha atthayojanā*):

tassa Sāriputta bhimsanakassa vanasandassa bhimsanakatasmim idam su hoti. bhimsanakatasmin ti bhimsanakabhāve ti attho. ekassa takārassa lopo daṭṭhabbo. bhimsanakakattasmim yeva vā pāṭho, bhimsanakatāya iti vā vattabbo, lingavipallāso kato. nimittatthe c' etam bhummavacanam, tasmā evam sambandho veditabbo: bhimsanakabhāve idam su hoti; bhimsanakabhāvanimittam, bhimsanakabhāvahetu, bhimsanakabhāvapaccayā idam su hoti: yo koci ... lomāni hamsantī ti.

This, Sāriputta, surely happens on account of this horrifying jungle-thicket's causing horror. [The word] *bhimsana-katasmim* means "on account of being horrifying." One should observe that a -t- [in *bhimsanakatasmim*] has been elided [from *bhimsanakat(t)asmim*]. Either the [correct] reading is

bhimsanakakattasmim, or one should read [as if it were] bhimsanakatāya, a change of gender (lingavipallāso) being made [of the abs. suffix -tā (f.) to -ta (m. or n.)]. Also (ca) this locative is used in the sense of a cause (nimittatthe). Therefore one should know that the connection (sambandho) [between the terms in the sentence, i.e., the syntax] is as follows: on account of being terrifying this surely happens, i.e., because of being terrifying, due to being terrifying, by reason of being terrifying this happens viz. that whoever enters this jungle-thicket without being devoid of passion, [his] hair as a rule stands on end.

This interpretation would seem to create as many problems as it tries to solve. Buddhaghosa is no doubt correct in suggesting the emendation bhimsanakattasmim, which makes better sense than the unusual compound bhimsana + kata. His gloss bhimsanakabhāve shows that he interprets, as one would assume, the abstract suffix -tta (n.) [< *-tva] according to Pān V 1 119: tasya bhāvas tvatalau. 28 There is no reason to believe, however, that he is right in claiming that the locatival tatra = tassa. Nor is Buddhaghosa's derivation of the particle sudam from the particle su = (*sma) + idam correct. It is rather to be derived from su + tam > sudam [= Sanskrit sma tad].²⁹ The reason is no doubt that he felt the need for a pronoun in construction with the relative pronoun ya, introducing the subordinate clause. In the case of sudam, however, canonical usage shows that it is exclusively used adverbially, i.e. as a particle (nipāta), which Buddhaghosa correctly suggests in the first alternative. The phrase tatra sudam or tatra pi sudam is often found in canonical narrative prose. 30 In every single case tatra has a locatival sense and sudam is merely used as an emphatic, often untranslatable, particle. It is clear that Buddhaghosa's interpretation is a result of a desperate attempt to construe an otherwise syntactically ambiguous sentence. First of all, he is forced to find a solution to the locative bhimsanakatasmim. Although he is probably correct in assuming that this form has to be

²⁶ Cf. Sp-t Be 1903 I 406,10–12: katan ti bhāvasādhanavāci idam padan ti āha bhimsanakatasmim bhimsanakakriyāyā ti. bhimsanassa karaṇam kriyā bhimsanakatam. tasmim bhimsanakatasmim.

²⁷ The interpretation of the locative (*bhummain*) in a causal sense (*nimittatthe*) is rarely met with in the Pāli Aṭṭhakathās. Apart from this example, I can only refer to Pj II 321,9 and 433,23 for similar interpretations of the locative in Pāli.

²⁸ There are many allusions to this Pāṇinian sūtra in the Aṭṭhakathās, e.g. Spk II 12,33 (ad S II 3,1): cavanatā ti bhāvavacanena lakkhaṇanidassanam = Vibh-a 100,20; māyāvino bhāvo māyāvitā, Vibh-a 493,16.

²⁹ Cf. O. von Hinüber, Überblick, § 134.

³⁰ For tatra sudam, cf. D I 1,10; M I 473,19; M II 164,5; for tatra pi sudam, cf. D I 119,1; II 91,6; II 126,6.

amended to read *bhimsanakattasmim*, it is nonetheless questionable whether his interpretation of the locative in a causal sense is correct. It is understandable, however, that Buddhaghosa, whose knowledge of grammar was largely, or perhaps exclusively, dependent upon Pāṇinian grammar, would try to find a solution to the problem of the locative *bhimsanakatasmim* in Pāṇinian grammar. He probably found it in Mahā-bh ad Pāṇ II 3 36 [+ vārttika 6 ad loc.].³¹ Vajirabuddhiṭīkā confirms this assumption by quoting a slightly edited Pāli version of a Sanskrit verse which Patañjali quotes ad loc. as an illustration of *nimittasaptamī*.³²

It is not possible to find an absolutely satisfactory solution to the syntactical problem of the sentence causing Buddhaghosa to write such an elaborate grammatical analysis. The locatival tatra is probably to be construed with the yo of the relative clause, and can, in fact, be interpreted in the sense of a nimittasaptamī. As for the locative bhimsanakattasmim (adopting Buddhaghosa's emendation), I would suggest interpreting it in a predicative sense³³ — for which there are a few interesting canonical examples [v. infra] — and translating the sentence in the following way:

This indeed, Sāriputta, is the reason why the horrifying jungle-thicket is called horrifying, namely, that whoever enters this jungle-thicket without being devoid of passion, [his] hair as a rule stands on end.³⁴

The whole purpose of the sentence is obviously to give an "etymology" of the word *bhimsanaka*, which is here explained with reference

cammani dipinam hanti, dantesu hanti kuhjaram vālesu cāmarim hanti, singesu saraso hato. to the root \sqrt{hams} [$<*\sqrt{hrs}$] \neq the stem \sqrt{bhims} - [$<bh\bar{t}sma$ deriv. $<*\sqrt{bh\bar{t}}$].35 Fanciful etymologies of this type, being based upon a superficial phonetic similarity, are a well-known feature in Indian literature.36 They are, for instance, to be found in great number in the Brāhmaṇa texts and the early Upaniṣads, not to mention Yāska's Nirukta. The way in which they are formulated, e.g. in the early Upaniṣads, would seem to lend support to Buddhaghosa's correction *bhimsanakatta*. In the majority of cases the reason for the nature or particular form of any given word x is explained there in terms of its x-ness.37 This fits very well into the present context, where the word *bhimsanaka* is explained in terms of its *bhimsanaka*-ness, which is due to the fact that it makes people's hair stand on end (*hamsanti*).

The predicative usage of the loc. is rarely met with in the canon. As a matter of fact, I have only been able to identify two canonical examples, both from the Dīghanikāya. One example is D I 63,22: *idam pi 'ssa hoti sīlasmim*: this is what he has as virtue. The other example is D II 221,7: *idam tesam hoti āsanasmim*: this is what they have as seat. 38 It is clear that Buddhaghosa was ignorant of this function of the loc. because in Sv 182,14–18 ad D I 63,22 he quotes the view of the Mahā-Aṭṭhakathā as an alternative to his own explanation according to which the loc. has a partitive sense [cf. Pāṇ II 3 41]. The Aṭṭhakathā, however, is correct in interpreting the loc. as equivalent to the nominative (= pacattavacanatthe) as shown by the quote *idam pi tassa samanassa sīlam*, which simply is one way of saying that the loc. has a predicative function. 39

Buddhaghosa's alternative suggestions for interpreting the above Vinaya passage are ingenious, but certainly wrong. The main reason is that in general his grammatical analyses are dependent on whether he can find a paragraph in Pāṇinian grammar that is applicable to the problem in question. This obviously is not the case in this context, and his failure to interpret the

³¹ Cf. Mahā-bh and vārt. 6 ad loc.: nimittāt karmasamyoge [= vārt 6]. nimittāt karmasamyoge saptamī vaktavyā.

carmani dvīpinam hanti dantayor hanti kunjaram keseşu camarīm hanti sīmni puskalako hatah.

³² Cf.: nimittatthe ti ettha

ti adhikaranam [Vjb Be 1960 57,26-27]; cf. Ja VI 61,3 foll. ≠ 78,17.

³³ This particular usage of the loc. in Pāli is normally found with verba sentiendi et dicendi [cf. O. von Hinüber, *Studien zur Kasussyntax des Pāli*, § 294]. The present usage differs syntactically from the few examples quoted in op. cit. § 294, in that it is not constructed with a verbum sentiendi et dicendi.

³⁴ In I. B. Horner's translation the sentence reads: Moreover, Sāriputta, whoever not devoid of passion, is in a terror of the awe-inspiring jungle-thicket, and enters the jungle-thicket, as a rule his hair stands on end [Book of the Discipline, I, p. 16].

³⁵ The association of \sqrt{hams} and \sqrt{bhims} is common in the canon. Cf., for example, the canonical juxtaposition of *lomahamsa* and *bhimsanaka* in D II 106,23.

³⁶ For examples from Pāli canonical lit., cf. Norman, "Four Etymologies from the Sabhiyasutta", Buddhist Studies in honour of Walpola Rahula, London 1980, pp. 173–84.

³⁷ Cf., for example, Brhadāranyakôpaniṣad I 2.1: so 'rcann acarat tasyârcata āpo 'jāyanta. arcate vai me kam abhūd iti. tad evârkasyârkatvam; v. ibid. I 2.5.

³⁸ Buddhaghosa does not comment on this clause. Perhaps the reason is that he did not find any suggestions in the old Atthakathā as to its interpretation.

³⁹ Cf. Sv loc. cit.: Mahā-Aṭṭhakathāyam hi idam pi tassa samanassa sīlan ti ayam eva attho vutto, which indicates that, in the commentarial tradition, there was a clear understanding of the predicative function of the locative.

193

sentence correctly can be ascribed to the fact that Pāninian grammar does not recognize a similar function of the locative.

1.6 samīpa [Sp 108,21-22 ad Vin III 1,6]

As appears from his reference to the usage of the loc. in the sense of cause (nimitta), Buddhaghosa must have been conversant with the Pāninian tradition as a whole. This is also the case in the context where he claims that the loc. is used in the sense of being close to or nearby something (samīpattha), although in this particular case he may rely on grammatical sources that are no longer accessible. In Sp 108,21-22,40 commenting upon the loc. Veranjāyam in the clause Veranjāyam ... viharati, he writes: Verañjāyam samīpatthe bhummavacanam: "by Verañjā" is a locative in the sense of vicinity (samīpa). Buddhaghosa illustrates the meaning of this particular usage with the following example: yathā Gangayamunâdīnam samīpe goyūthāni carantāni Gangāya caranti Y amunāya carantī ti vuccanti evam idhâpi [= Sp 109,18-19]: just as the cowherds that graze in the vicinity of [the rivers] Ganges and Yamuna are said to graze by the Ganges and the Yamuna, so also in this context.

Although there is no mention of this usage of the loc. in Pānini, it can be traced to Mahā-bh II 218,14-19 where it is used in a context analogous to the one with which Buddhaghosa is dealing: tatsāmīpyāt: Gangāyām ghosah [= Mahā-bh loc. cit.]. Elsewhere Patañjali mentions three types of locatival kāraka relations: adhikaranam nāma triprakāram vyāpakam aupaślesikam vaisayikam iti [= Mahā-bh ad Pān VI 1 72]. To these the Pāli grammarians add sāmīpika.⁴¹ Although there can be no doubt that the use of sāmīpika has its origin in Mahā-bh — Aggavamsa's citation of Mahā-bh loc. cit. in connection with his discussion of sāmīpika proves this beyond doubt — it has not been possible to find a justification, in contemporary Sanskrit grammatical sources, for the inclusion of samīpa in the locatival kāraka relations; therefore its historical background remains unclear. 42 Buddhaghosa's

example illustrating the samipattha is analogous to the one used by Candragomin in Candravrtti [ad II 1 88]: gangāyām gāvah, but Candragomin does not use the corresponding technical term for defining the nature of the locative. One cannot, of course, exclude the possibility that Buddhaghosa has taken his example from a common stock of examples illustrating sāmīpya and that he applied it ad hoc. For instance, one finds the following illustration of sāmīpya in Vātsyāyana's Bhāṣya ad Nyāyasūtra II 2 62: sāmīpyād gangāyām gāvas caranti.

[B]

Grammatical references in Paramatthajotikā I-II

Almost all the references to the views of the grammarians, or occasional allusions to Pānini, that are found in Pj I and II have already been identified by Helmer Smith in his careful editions of these important commentaries, but he never attempted a study of them. They are interesting and should be included in a study of the Pali grammatical tradition as it is reflected in the Atthakathas. Since Pi II was written before Pi I, it is here treated before Pi I.

[Pj II 23,12–26 ad Sn 14]

In the first example the author deals with two problems. The first is an apparent morphological anomaly: the pp. $sam\bar{u}hat\bar{a}se$ [< * $samud + \sqrt{han}$] that occurs in the clause: yassa ... mūlā akusalā samūhatāse "who has destroyed all the evil roots." On this form he writes:

samūhatā icc' eva attho, paccattabahuvacanassa hi (a)sakārâgamam⁴³ [so read? Ee sa-; Be se-] icchanti saddalakkhanakovidā. atthakathâcariyā pana se ti nipāto ti vannayanti. yam ruccati, tam gahetabbam.

⁴⁰ For other references to *samīpattha*, cf. Sv I 132,23; Spk I 12,31 = Mp I 15,1 = Pj I 111,5.

⁴¹ Cf. the *kārikā* qu. in Rūp Ce 1897 113,29–30:

vyāpiko: tilakhīrādi; kato: opasilesiko sāmīpiko: gaṅgâdi; ākāso: visayo mato.

⁴² It is noteworthy that the examples of the usage of the locative that are quoted in Candravrtti ad Candra II 1 88 (kate āste. ākāśe kunayah. tileşu tailam. Gangāyām gāvah) are used as illustrations of the various types of locative relations that are mentioned in the verse

quoted by Buddhapiya in Rūp Ce 1897 113,29-30 [q.v. supra]. Comparatively late Sanskrit grammatical sources mention sāmīpyaka (scil. adhikarana) as a subset of the locative kāraka; v. Renou, Terminologie, s.v. adhikarana.

⁴³ For this emendation, cf. the discussion infra.

195

The meaning is the same as (eva) [of the form] "samūhatā," because (hi) the grammarians claim that the nominative plural (paccattabahuvacanassa) gets the augment as. The teachers of the Aṭṭhakathās, however, comment that se is a particle. One may adopt whichever [view] one prefers.

One finds here the same scholarly attitude towards grammatical problems as is normal practice in Buddhagosa [cf. Studies in the Pāli Grammarians I]: first the view of the grammarians is presented and then the view of the atthakathâcariyas.

The reading sakārâgama, however, is problematic. One would expect the reading sekāra- in accordance with the canonical reading, but the manuscript tradition seems to consistently read sa for the expected se.44 Assuming that the reading sa is not an old corruption and that the author is trying to explain the ending -ase with reference to the grammarians' view, one might suggest reading asakārâgama, from which the a was probably elided in conjunction with the immediately preceding hi. If this assumption is correct, then the reference to grammarians (saddalakkhanakovidā) becomes understandable. As a rule such references are to Sanskrit grammarians. This implies that the author is referring to Sanskrit;⁴⁵ and in this particular case he is probably thinking of those Vedic plural forms ending in -āsas, which Pāṇini addresses in Pān VII 1 [38+] 50: $\bar{a}jjaser\ asuk$: after stems in a or \bar{a} [the nom. pl. augment as] gets [in the Veda the augment denoted] asuk [= as]. 46 However, the author of Pj was probably not aware of the fact that Sanskrit -āsas > Pāli -āse.⁴⁷ His primary intention seems to have been to contrast Sanskrit nom. pl. forms in -āsas with analogous Pāli nom, pl. forms in -āse. 48 It is therefore surprising that an authority like Aggavamsa regards the se as not constituting a part of the pl. form itself (apadâvayava), and that he thus would seem to agree with the atthakathâcariyās that se is a particle $(nip\bar{a}ta)$.⁴⁹

The next problem the author addresses is the present form jahāti occurring in the first line of the refrain of the Uragasutta: so bhikkhu jahāti orapāraṃ: this monk abandons this shore and the far shore, on which he writes the following concise comment:

n' eva ādiyati na pajahati, pajahitvā thito ti vutto. tathā pi vattamānasamīpe vattamānavacanalakkhaņena [≠ Pāṇ III 3 131] jahāti orapāran ti vuccati.

What is meant is that he neither appropriates nor abandons, being in a state where he already has abandoned (pajahitvā thito). In the same way also [the present form jahāti in the clause] "he abandons (jahāti) this and the far shore" is used, according to the rule about the present [being used to express the past or the future time], when [the past or the future time is] contiguous to the present time (vattamānasamīpe).

This interpretation alludes to Pāṇ III 3 131, in which Pāṇini lays down the rule that affixes that are employed for denoting the present time may also be used to express the past or future time, provided that they express the immediate past or future: $vartamānasāmīpye\ vartamānavad\ v\bar{a}$: optionally, [the affixes that are used to express the present time] may in the same way as when the meaning is that of present time, be used [in the sense of past or future time] when [the past or the future time is] contiguous to the present.

The reason why Buddhaghosa alludes to this sūtra is, of course, that the present form jahāti of the refrain follows immediately after the pp. samūhatāse. This would seem to create a logical problem, because having given up mūlā akusalā is, according to Buddhaghosa, equivalent to having given up "this and the far shore." He therefore solves the problem with reference to this particular Pāṇini sūtra. In the present context this means that the tense value of the pp. samūhatāse takes precedence over the tense value of jahāti which thus assumes a past tense value, referring to the

⁴⁴ The reading of Be is probably a modern attempt at being consistent.

⁴⁵ He refers explicitly to Vedic Sanskrit (sakkata) at Pj II 43,21, q.v. infra.

⁴⁶ One cannot, of course, exclude the possibility that the author refers to the normal Sanskrit plural ending $-\bar{a}s$, and that the $sak\bar{a}r\hat{a}gama$ is to be intrepreted with reference to the Pāli plural ending $-\bar{a}+s$, which represents the normal Sanskrit nom. pl. ending. If so, it leaves the -e in $-\bar{a}se$ unexplained.

⁴⁷ The ending -āse is probably a reflex of an eastern Prakrit; cf. O. von Hinüber, Überblick, § 312. Analogous nom. pl. forms that occur in Sn are passed over in silence in Pj II, but they are correctly identified as such; cf. Pj II 368,5: upāsakāse ti upāsakā icc eva vuttam hoti (ad Sn 376); II 553,28: paṇḍitāse = paṇḍitā (ad Sn 875).

⁴⁸ This appears clearly from the way in which he correctly contrasts the form *carāmase* in Sn 32 with Sanskrit *carāmasi* at Pj II 43,21-22; v. infra.

⁴⁹ Cf. Sadd 513,14-15: apadâvayavo pana ... "mūlā akusalā samūhatā se [= Sn 14]."

immediate past. Thus, following Buddhaghosa's analysis, one might translate the refrain: he has given up this and the far shore.

In the following example Buddhaghosa addresses the problem of the form carāmase that occurs in the verse: Gopī ca ahañ ca ... brahmacariyaṃ Sugate carāmase [= Sn 31]. He writes:

carāmase iti carāma yam hi tam sakkatena carāmasī ti vuccati, tam idha carāmase iti. aṭṭhakathâcariyā pana se iti nipāto ti bhaṇanti, ten' eva c' ettha āyācanattham sandhāya carema [v.l. carā-] se iti pi pāṭham vikappenti. yam ruccati, tam gahetabbam.

[The form] $car\bar{a}mase = car\bar{a}ma$, because [the form] which in Sanskrit reads $car\bar{a}masi$, in this [verse reads] $car\bar{a}mase$. The teachers of the Aṭṭhakathā, however, say that se is a particle $(nip\bar{a}to)$, and therefore they optionally propose (vikappenti) the reading caremase, with regard to the meaning of the vow [expressed] therein [i.e. in the verb $car\bar{a}mase$ $(etthase ay\bar{a}canatthamsesandhaya)$]. One may adopt which [view] one prefers.

It appears from Buddhaghosa's commentary that he interprets $car\bar{a}mase = car\bar{a}masi$ [Vedic ind. pr. 1 pl.]. We may therefore deduce that he also knew Sanskrit (sakkata) in its Vedic form, at least to the extent that it is covered by Pāṇini's rules for chandas. This fact also lends support to the suggestion [v. supra] that he contrasted Pāli nom. pl. $-\bar{a}se$ with Vedic nom. pl. $-\bar{a}sas$, and that the proposed emendation therefore may be correct.

It is, of course, another question whether Buddhaghosa is correct in suggesting that $car\bar{a}mase = car\bar{a}masi = car\bar{a}ma$. The form $car\bar{a}mase$ itself is ambiguous and admits of two interpretations: it may either be interpreted as indicative mid. 1 pl. [cf. Geiger § 122, which cites analogous forms that cannot be interpreted as subjunctive forms], the ending -mase being the middle counterpart of Vedic -masi, or as subjunctive mid. 1 pl. [cf. Geiger § 126 according to which $car\bar{a}mase$ belongs to this category]. 50 In this case there is no reason to doubt that it is a subj. mid. form, and we may therefore translate Sn 31: Gopī and I ... shall practice brahmacariya for the sake of

Sugata ($sugate = nimittasaptam\bar{\imath}$). The atthakathacariyas apparently had preserved the tradition that it was a subjunctive 51 [cf. the phrase $\bar{a}y\bar{a}canattham$ $sandh\bar{a}ya$], but they clearly were unable to analyse correctly the form itself, which is a Middle Indian innovation. Since Buddhaghosa had no other possibility of identifying the form than to try to find as close a parallel in Sanskrit as possible, he could only suggest that $car\bar{a}mase = car\bar{a}masi.^{52}$ In those cases where analogous forms occur, he might have been correct [for the present ind. forms, cf. the forms listed in Geiger § 122], but in this context it would seem necessary to interpret $car\bar{a}mase$ as a subjunctive. 53

In this example the presence of the ind. mid. 3 sg. kurute, in the verse sante na kurute piyam:54 he does not make good men his friends, gives Buddhaghosa another opportunity to display his knowledge of Pāninian grammar. He offers two alternative explanations of this clause, only the first of which can be considered correct: sante na kurute piyam, attano piye itthe kante manāpe na kurute iti attho [= Pj II 169,11-13]. From this paraphrase it appears that he correctly interprets piyam [= eastern acc. pl. piye], in apposition to sante [eastern acc. pl.].⁵⁵ This interpretation probably represents the view of the atthakathâcariyas. In the second alternative, however, he suggests interpreting kurute according to Pan I 3 32, which lays down the rule that when the verb \sqrt{kr} inter alia means "to revile" or "to serve," the middle (ātmanepada) is used, even though the fruit of the action does not fall to the agent (gandhanâvaksepanasevanasāhasikyaprativatnaprakathanôpayogesu krñah). He therefore suggests the following paraphrase: sante na sevatī ti attho yathā rājānam sevatī: they do not serve the good men, on the grounds that the grammarians take, e.g. the expression "rājānam pakurute" in the same meaning (etasmim atthe "rājānam pakurute" ti saddavidū mantenti).56 The suggestion is ingenious, and it is therefore

⁵⁰ Cf. also Norman, Elders' Verses II, n. ad Th 370–71; O. von Hinüber, Überblick, § 433.

⁵¹ This speaks for the historical validity of the Atthakathā tradition, which in many cases has preserved the correct interpretation; cf. n. 39 supra.

⁵² He evidently took *carāmase* = *carāmasi* = *carāma*, because he quotes Ja IV 53,20: brahmacariyam carāma as a parallel.

⁵³ This applies mutatis mutandis to the interpretation of *bhavāmase* in the following line of Sn 31; cf. Pj II 44,2-4.

⁵⁴ Cf. Dhp 217: tam jano kurute piyam: such a man the world makes its friend.

⁵⁵ For piyam = eastern acc. pl., v. Lüders, Beobachtungen, § 205.

⁵⁶ Cf. Fausbøll's translation which tries to do justice to the "Pāṇinian" interpretation: he does not do anything that is dear to the good, which Lüders [op. cit., § 205] incorrectly claims does not do justice to the medium.

surprising that Buddhaghosa did not simply take *piyam* as acc. pl. in apposition to *sante*, but proposed to interpret *piyam* as a part.⁵⁷ Indeed, it cannot be entirely excluded that we have to translate: the good men he does not treat as his friends. Nor is it impossible that the parallel in Dhp 217: *tam jano kurute piyam*, is to be translated as: such a man the world treats as a friend.

[Pj II 321,10–12 ad Sn 302]

Commenting on the phrase "pahūtadhanadhañño 'si, yajassu, bahu te vittam, yajassu, bahu te dhanam," Buddhaghosa writes:

pahūtadhanadhañño 'sī ti, pahūtadhanadhañño bhavissasi abhisamparāyan ti adhippāyo, āsaṃsāyaṃ hi anāgate pi vattamānavacanam icchanti saddakovidā.

The intention $(adhipp\bar{a}yo)$ of [the clause] "you become⁵⁸ abundantly rich" is "you shall become abundantly rich in the future," because (hi) those who are well versed in grammar $(saddakovid\bar{a})$ claim that, in the case of a wish $(\bar{a}sams\bar{a})$, the present is also used in the sense of the future.

The grammarians to whom the author refers here are, as one would expect, Pāṇinians. In this case the Pāṇinian rule that justifies his exegesis is found in Pāṇ III 3 [131+] 132: āśaṃsāyāṃ bhūtavac ca: in the case of a wish [the affixes that are used to express the present time or the past time] may [optionally, i.e., instead of the affixes expressing the future time] be used in the same way as when [the meanings are that of present time] and that of past time.

The intention of the reference to the grammarians becomes clear when one takes a look at Buddhaghosa's paraphrase: mahārāja, bahu te vittam dhanañ ca, yajassu, āyatim pi pahūtadhanadhañño bhavissasī ti. He simply wants to show that the Sn clause has the following underlying structure: May you offer [= if you offer] ... then you shall become abundantly rich. It is therefore clear that he is forced to give a reason for why the present form asi, which he tacitly interprets as equivalent to bhavati, is used instead of the expected future. He consequently turned to the relevant Pāṇini sūtra which would seem to justify his exegesis. However, there is

nothing in the verse that would support this learned display of Sanskrit grammar. The clause $pah\bar{u}tadhanadha\tilde{n}\tilde{n}o$ 'si is clearly syntactically co-ordinated with the clauses bahu te vittam and bahu te dhanam, and thus one cannot, without distorting the syntax of the verse, attribute the value of $\bar{a}sams\bar{a}$ to the usage of asi.

[Pj I 17,28–19,22 on "buddham saranam gacchāmi"]

Nearly all the exegeses of grammatical interest that occur in Paramatthajotikā I are found in identical or slightly edited forms in other commentaries ascribed to Buddhaghosa. However, in one case where he deals with the controversy over the correct interpretation of the canonical stereotype buddham saranam gacchāmi, the scope of the discussion goes far beyond the corresponding treatment of the same sentence in his other commentaries. Buddhaghosa deals briefly with the analogous phrase, Bhagavantam saranam gacchāmi, in Sv 229,18–23,60 but without even touching upon the grammatical question of co-referentiality [= apposition (samānâdhikaraṇatta)], which is the focal topic of the controversy recorded in Pj I. The following section is the most interesting part of it from a grammatical point of view:61

codako āha: buddham saraṇam gacchāmī ti ettha, yo buddham saraṇam gacchati, esa buddham vā gaccheyya saraṇam vā. ubhayathā pi ca ekassa vacanam niratthakam. kasmā? gamanakiriyāya kammadvayâbhāvato, na h' ettha "ajam gāmam netī" ti ādisu viya dikammakattam akkharacintakā icchanti, — "gacchat' eva pubbam disam gacchati pacchimam disan" [= S I 122,2] ti ādisu sâtthakam evā ti ce, — na: buddhasaraṇānam samānâdhikaraṇabhāvassânadhipetato, etesam hi samānâdhikaraṇabhāve adhippete paṭihatacitto pi buddham upasaṃkamanto buddham saraṇam gato siyā, yam

⁵⁷ Cf. Pj II 169,16–17: piyan ti pīyamāno tussamāno modamāno ti attho.

⁵⁸ I translate asi = bhavati in accordance with Buddhaghosa's intention; v. infra.

⁵⁹ This is one of several indications that Pj I may not be by Buddhaghosa.

⁶⁰ Cf.: bhagavā me saranam parāyanam, aghassa tātā hitassa ca vidhātā ti iminā adhippāyena etam gacchāmi bhajāmi sevāmi payirupāsāmī ti evam vā jānāmi, bujjhāmī ti, yesam hi dhātūnam gati attho, buddhi pi tesam attho, Sv 229,20-22 ≠ Pj I 19,1-3.

⁶¹ Unfortunately the purport of the entire passage was misunderstod by Ñanamoli who translated samānâdhikaraṇabhāva as "identical causativity" [v. Illustrator, p. 10 foll.].

hi tam "buddho" ti visesitam saranam, tam ev' esa gato ti [= Pj I 17,29–18,6].

The objector (codako) says: In the [proposition] "I go to the Buddha, [to] protection," the one who goes to Buddha, [to] protection, may either go to the Buddha or to the protection. In either case (ubhayathā pi), however, the word [that denotes] one [of them, i.e. Buddham or saranam] is meaningless. — How can that be? — Because the verbal action of going does not take two object [kārakas (kammadvaya)]; for in this case the grammarians do not claim that there are two object [kārakas], in the same way as in [the proposition] "he takes the goat to the village." Suppose you object that [the word that denotes one of them] is meaningful, in the same way as, for instance, [the word pubbam or disam in the phrase from S I 122,2]: "he goes to the eastern region, he goes to the western region." This [assumption] is wrong (na), because it is not intended that [the word] Buddha and [the word] protection be co-referential [i.e., in apposition (buddhasaranānam samānâdhikaranabhāvassânadhipetato)]; for (hi) if it were intended that they be co-referential, even a depraved person who approached the Buddha would come to the Buddha as protection, because he has come to precisely that protection which is qualified as "Buddha" (buddho ti visesitam).

The first objection is based upon the grammarians' assumption that \sqrt{gam} cannot be constructed with two accusatives — except in its causative form — in the same way as \sqrt{ni} . 62 The example used for illustrating the opposition between \sqrt{ni} and \sqrt{gam} : ajam gāmam neti, is quoted from a related discussion in Mahā-bh [= ajām nayati grāmam, Mahā-bh I 335,13 ad Pāṇ I 451].

The next objection starts from the assumption that *Buddham* and *saraṇaṃ* are in apposition (*samānâdhikaraṇabhāva*). The idea is that *saraṇaṃ* qualifies *Buddhaṃ* in the same way as the two adjectives *pubbaṃ* or *pacchimaṃ* qualify *disaṃ*. In his ṭīkā [ad Sv 229,18-23] Dhammapāla claims

that it is necessary to complement the sentence according to its underlying syntax. In his view an *iti*, showing the apposition, has been elided after saranam. The correct reading, according to Dhammapāla, should therefore be: bhagavantam saranan iti gacchāmi.⁶³ The author of Pj I objects to a similar view by pointing to the fact that, for instance, at S III 57,7: aniccam rūpam aniccam rūpam ti yathābhūtam pajānāti, there is no iti found after aniccam, as one would expect.⁶⁴ Consequently there is no need for complementing the sentence, which simply has to be interpreted as if an iti had been applied (payutto viya).⁶⁵ The claim that saranam stands in apposition to Buddham or Bhagavantam would seem to be grammatically sound. Accordingly we should translate the canonical stereotype: I go to the Buddha as [my] protection.

[B] 1 [Pațis-a 538,6–8 ad Pațis II 4,4–6]

In this grammatical note Mahānāma deals with the semantical and syntactical conditions under which the past participle in -ta is constructed with the genitive. The passage commented upon reads:

na m' ete bhikkhave samaṇā vā brāhmaṇā vā samaṇesu c' eva samaṇasammatā brāhmanesu ca brāhmanasammatā.

I do not, monks, consider these recluses or brāhmaṇas to be recluses among recluses and brāhmaṇas among brāhmanas.

In this clause $samanasammat\bar{a}$ is to be construed with me, and Mahānāma therefore comments:

samanasammatā ti na mayā samanā ti sammatā. sammatā ti vattamānakālavasena vuccamāne saddalakkhanavasena me ti ettha sāmivacanam eva hoti.

⁶² Cf. the corresponding discussion at Sv-pț I 357,19-20 [ad Sv 229,18-23]: ettha ca nâyam gamusaddo nīsaddâdayo viya dvikammako.

⁶³ Cf. Sv-pt I 357,21–23: bhagavantam saraṇam gacchāmī ti vattum na sakkā; saraṇan ti gacchāmī ti pa vattabbam. itisaddo c' ettha luttaniddittho.

⁶⁴ The author evidently interprets the syntactical function of *niccain* as equivalent with, e.g., the predicative usage of ablatives in -to [< *-tas] used at S III 57,5 (attato).
65 Cf. Pi I 19,4 foll.

samanasammatā, i.e. I do not consider them as recluses. When [the past participle] sammatā is used in terms of the present tense, then (ettha) according to the grammatical rule, [the personal pronoun] me stands exclusively (eva) in the genitive.

Although Mahānāma refers to a specific Pāṇinian rule codified in Pāṇ II 3 67, his explanation also presupposes Pāṇ III 2 188. In this sūtra Pāṇini defines the semantical conditions under which the past participle in -ta is present in meaning: $matibuddhip\bar{u}j\hat{a}rthebhyas$ ca: And after [the roots] that denote thought, understanding or respect [the past participle affix denoted kta is used in the sense of the present tense]. This rule applies to the past participle sammata [$< sam + \sqrt{man}$] which is subsumed under the Pāṇinian mati [$< \sqrt{man}$].

The rule that applies to the construction with me is found in Pāṇ II 3 67 where Pāṇini lays out the conditions under which a past participle in -ta is constructed with the genitive: $ktasya\ ca\ vartam\bar{a}ne$: And [the past participle affix denoted] $kta\ (=-ta)$, when it is used in the sense of the present tense, takes [the genitive of the agent in construction].⁶⁷ Since the enclitic form me, from a purely morphological point of view, is equivalent to the three case forms $may\bar{a}\ [= instr.]$, $mayham\ [= dat.]$, and $mama\ [= gen.]$, Mahānāma uses the delimitative particle eva in order to emphasise that in this particular syntactical construction it is only possible to interpret me as genitive.⁶⁸

2 [Pațis-a 481,26–32 ad Pațis I 172,34]

This reference takes its point of departure in a pun based upon the phonological affinity of $\sqrt{c}i$ with $\sqrt{j}i$. Commenting upon the word paricitā at Paṭis I 172,5: $\bar{a}n\bar{a}p\bar{a}nasati$ yassa ... anupubbaṃ paricitā yathā Buddhena desitā, Paṭis explains that sati is called paricitā [$<\sqrt{c}i$] because it conquers [$jin\bar{a}ti < \sqrt{j}i$] bad and evil dhammas (satiyā parigganhanto $jin\bar{a}ti$ $p\bar{a}pake$ akusale dhamme, tena vuccati paricitā). On this text Mahānāṃa writes inter alia the following commentary:

te ca dhammā satim avihāya attano pavattikkhane jinitum āraddhā 'jitā' ti vuccanti, yathā bhuñjitum āraddho 'bhutto' ti vuccati. lakkhanam pan' ettha saddasatthato veditabbam. evam sante 'pi parijitā ti vattabbe ja-kārassa ca-kāram katvā paricitā ti vuttam ... imasmim atthavikappe paricitā ti padam kattusādhanam.

And these [evil] dhammas that have started being conquered ($jinitum\ \bar{a}raddh\bar{a}$) at the moment, when he, without forsaking being mindful, applies himself [to the destruction of them], are said to have been conquered, in the same way as [someone who] has started eating ($bhu\bar{n}jitum\ \bar{a}raddho$) is said to have eaten. The rule, moreover, [that applies] in this case (ettha) should be known according to grammar (saddasatthato). Even though [the word $paricit\bar{a}$] in those cicumstances ought to read $parijit\bar{a}$, [the reading] $paricit\bar{a}$ is used by substituting the letter c for the letter j ... In this alternative meaning the word $paricit\bar{a}$ [in its identity with $parijit\bar{a}$] is active ($kattus\bar{a}dhanam$).

There is no need to go into all the details of this exegetical tour de force: the basic intention is to show that $paricit\bar{a} = parijit\bar{a}$ as a qualifier of sati [mindfulness] points to the fact that sati when practised properly (= paricita) annihilates the evil dhammas. The reading $paricit\bar{a}$ is well attested in canonical Pāli where it occurs in similar contexts. Mahānāma obviously took the pun of Paṭis as an occasion for displaying his knowledge of grammar.

The reference itself is rather obscure, but from the context it seems clear that he must have thought of those cases — as shown by his remark that the word paricitā is active (kattusādhana) — where a -ta participle [= kta] is used in an active sense, while at the same time having an inchoative sense, as indicated by the paraphrase jinitum āraddhā or bhuñjitum āraddho. A past participle in -ta is normally not used in the sense of the agent kāraka, i.e. in an active sense. In Pāṇ III 4 71, however, Pāṇini defines the semantical and syntactical conditions under which this is possible: ādikarmani ktah

⁶⁶ Cf. Kāś ad loc.: etadarthebhyaś ca dhātubhyo vartamānârthe ktapratyayo bhavati: rājñām matah, rājñām iṣṭaḥ, rājñām buddhah, rājñām jñātah, rājñām pūjitah, rājñām arcitah.

⁶⁷ Cf. Kāś ad loc.: ktasya vartamānakālavihitasya prayoge sasthī vibhaktir bhavati: rājňām matah, rājňām buddhah.

⁶⁸ Cf. Buddhaghosa's grammatical observations in Sv 28,8 foll. about the three meanings of *me*.

⁶⁹ Cf. the corresponding technical term of Sanskrit grammar *kartṛṣādhana*, on which see Renou, *Vocabulaire*, s.v.

⁷⁰ Cf., for example, S I 116,30; II 264,15.

kartari ca: the suffix "kta" is also used in the sense of the agent $[k\bar{a}raka]$, in the case of an inchoative action $(\bar{a}dikarmani)$. The Kāśikā [q.v. ad loc.] illustrates this rule by the following examples: praknah kaṭam devadattaḥ: D. has started making a mat, and prabhukta odanam devadattaḥ: D. has started eating. In this example the word praknah or prabhuktah is in agreement with the agent $[k\bar{a}raka]$ Devadatta, and it is therefore, according to Pāṇinian syntactical theory, used in the sense of the agent $[k\bar{a}raka]$. As shown by the example, the kta participle is constructed with the object $k\bar{a}raka$ [= kaṭam or odanam].

Although one would have expected Mahānāma to illustrate his analysis with a more appropriate example (the context requires pabhutto, with the preposition pa [< *pra] indicating the inchoative aspect of the action, pa1 instead of pa2 indicating the inchoative aspect of the action, pa3 instead of pa4 indicating the inchoative aspect of the action, pa4 instead of pa5 indicate is no reason to doubt that he refers to a grammatical rule similar to pa6 in III 4 71. It is therefore surprising that his grammatical analysis does not reflect the pa6 initian technical vocabulary. For instance, he uses pa6 in the pa9 initian pa6 in III 4 71. It is therefore surprising that his grammatical analysis does not reflect the pa9 initian pa9 initian pa9 in III 4 71. It is therefore surprising that his grammatical analysis does not reflect the pa9 initian pa9 indicate that he may well be referring to Candravyākaraṇa which substitutes pa9 for the pa9 initian pa9 for the pa9 initian pa9 for the pa

Although Candragomin's grammar is written in the Pāṇinian tradition and does not deviate substantially from Pāṇini, it exhibits nonetheless noticeable innovations in its technical vocabulary. It is difficult to explain Mahānāma's usage of ārambh- in this particular context unless we assume that he is dependent on a Sanskrit model, which in the present case is probably identical with Candravyākaraṇa: it would only be natural for a Buddhist scholar to avail himself of the grammar of a fellow Buddhist scholar.

3 [Patis-a 567,12–16 ad Patis II 63,34–35]

This discussion shows that Mahānāma knew of the controversy over the semantical properties of the absolutive suffix. I have dealt with Buddhaghosa's treatment of this question in Studies in the Pāli Grammarians I, and I therefore refer the reader to the previous article in this series.⁷³ I should add, however, that Buddhaghosa actually does seem to be aware of the problems involved in putting a strict Pāṇinian interpretation on certain constructions with the absolutive, although it is difficult to decide from what he says whether or not he draws upon the grammarians' discussion of the problem.

The text in question occurs in Vism 653,21–28 where Buddhaghosa comments upon the same Paţis passage as Mahānāma. Mahānāma copied verbatim most of Buddhaghosa's commentary. He deleted the introductory clause and inserted a reference to the grammarians' view before the concluding passage, where Buddhaghosa explains that the origination process of knowledge has to be taken as a unity. Mahānāma's intention was probably to complement Buddhaghosa's explanation by showing that it was also supported by the authority of the grammarians.

"nimittam paṭisankhā ñāṇam uppajjati [= Paṭis loc. cit.]."⁷⁴ kāmañ ca na paṭhamam jānitvā pacchā ñāṇam uppajjati. vo-hāravasena pana "manañ [Ee w.r. mā-] ca paṭicca dhamme ca uppajjati manoviññāṇan [= S IV 33,32]" ti ādīni viya evam vuccati [= Vism loc. cit.]. ⁷⁵ Saddasatthavidū 'pi ca "ādiccam pāpuṇitvā tamo vigacchatī" ti ādīsu viya samānakāle 'pi imam padam icchanti. ekattanayena vā purimañ ca pacchimañ ca ekam katvā evam vuttan ti veditabbam [= Vism loc. cit.].

"Knowledge arises by reflecting (paṭisaṅkhā) upon the object (nimittaṃ)." And it is by no means the case (kāmaň ca na) that, after having previously become known, knowledge subsequently arises. The [above passage] is propounded in accordance with common usage (vohāravasena), in the same way as the [canonical proposition] "In dependence on the mind and the mental objects (dhamme) mental cognition arises," and the like. The grammarians, moreover, acknowledge (icchanti)

⁷¹ Cf. Jinendrabuddhi's Nyāsa ad Kāśikā ad Pāņ III 4 71: sarvatra praśabda ādikarma dvotavati.

⁷² Cf. Mogg-v ad V 58: kattari cârambhe. kriyârambhe kattari kto hoti ... pakato bhavam kaṭam. Moggalāna, as is well-known, has to a large extent based his grammar upon Candravyākarana.

⁷³ Cf. Studies in the Pāli Grammarians I, p. 51 foll.

⁷⁴ Mahānāma has deleted the following passage from Vism 653,21: sankhāranimittam adhuvam tāvakālikan ti aniccalakkhanavasena jānitvā.

⁷⁵ Here ends the first part of the quotation from Vism. The second part begins with the concluding clause *ekattanayena*... *veditabbain*.

this [type of] inflected word $(padam)^{76}$ [= $patisankh\bar{a}$] even when [the absolutive affix attached to the verb $patisankh\bar{a}ti$ expressing one action] is used in the sense of being simultaneous in time $(sam\bar{a}nak\bar{a}le~pi)$ [with the other action expressed by the verb uppajjati] as, for instance, in the [proposition] "Darkness disappears in contact with the sun." Optionally $(v\bar{a})$, one should know, according to the unity method (ekattanayena), that it is expressed in this way by taking the preceding [action] and the subsequent [action] as one $(ekam~katv\bar{a})$.

There is no way of explaining why Buddhaghosa, who obviously knew that the absolutive in certain cases admits of being interpreted in the sense of *samānakāla*, did not refer to the grammarians in this case. The definition laid out in Pāṇ III 4 21: *samānakartṛkayoḥ pūrvakāle*, clearly does not apply, and one would have expected him to point that out. Mahānāma, however, interprets Buddhaghosa's explanation in the light of Kātyāyana's supplement to Pāṇ III 4 21.⁷⁹

Although the discussion of the semantics of the absolutive suffix can be traced back to Kātyāyana and Mahā-bh ad Pāṇ III 4 21, Kacc⁸⁰ and its main source, the Kātantra, take no notice of it. Nor do Vajirabuddhi [in Mmd ad Kacc 566] or Buddhapiya [ad Rūp 624 = Kacc 566], who copied almost verbatim the relevant passage from Mmd, go into a discussion of the problem. The same is the case with Moggallāna ad Mogg V 64. Aggavaṃsa, however, deals with it, and he may well be one of the first Pāli grammarians to have done so.⁸¹

II 1 [Bv-a 25,26–30 ad Bv I 4b]

In this example, the most discursive of his grammatical analyses, Buddhadatta exhibits three ways of analysing the word "buddha" [formally a

past participle in -ta], as it occurs in Bv I 4b (buddho ayam īdisako naruttamo):

Buddho ti catusaccadhamme buddho anubuddho ti buddho, yathâha:

abhiññeyyam abhiññātam bhāvetabbañ ca bhāvitam pahātabbam pahīṇam me tasmā buddho'smi brāhmana [= Sn 558]

Idha pana kattukārake buddhasaddasiddhi daṭṭhabbā. (so punctuate) adhigatavisesehi devamanussehi sammāsambuddho vata so bhagavā ti evam buddhattā ñātattā buddho. idha kammakārake buddhasaddasiddhi daṭṭhabbā. buddham assa atthī ti vā buddho buddhavanto ti attho. tam sabbam saddasatthânusārena veditabbam.

Buddha means [one who has] undertaken to know, [one who has] undertaken to recollect,⁸² the norms of the four truths. As he says [in Sn 558]:

I have obtained insight into that into which one should obtain insight, and realised what has to be realised, and rejected what has to be rejected, therefore, brāhmana, I am a Buddha.

In this [verse] the formation (siddhi) of the word "buddha" should be taken in the sense of the agent $k\bar{a}raka$ ($kattuk\bar{a}raka$), [i.e. in a transitive/active sense]. [Or, alternatively,] he is [called] Buddha because he is recognised and acknowledged by gods and men who have obtained eminence, in the following words: "the Bhagavan, indeed, is fully awakened." In this case the formation of the word "buddha" should be taken in the sense of the object $k\bar{a}raka$. Or ($v\bar{a}$), he is Buddha because (iti) he has ($assa\ atthi$) awakening ($buddha\ [n.]$),83 that is, he is "one who possesses awakening

⁷⁶ Cf. the Pāṇinian definition of pada (n.) in Pāṇ. I 4 14: suptinantaṃ padam.

⁷⁷ For analogous examples, cf. AkBhāṣ 455,7-8: sahabhāve 'pi ca ktvâsti dīpam prâpya tamo gatam; Vism-sn p. 1254,12: dīpam prâpya tamo vigacchati.

⁷⁸ For this term, cf. CPD s.v. ekattanaya.

⁷⁹ Cf. vārttika 5 and Mahā-bh ad loc.

⁸⁰ Cf. Kacc 566: pubbakālekakattukānam tun-tvāna-tvā vā.

⁸¹ Cf. the discussion at Sadd 312,22–313,30.

⁸² The reason for this translation will appear from the analysis below.

⁸³ Formally *buddha* (n.) is a neuter pp. used as a noun by analogy with neuter pp. forms in Sanskrit. Cf. Nidd 458,7 and 459,7 [ad Sn 957] and Pj I 16,2: *buddhi*, *buddham*, *bodho ti pariyāyavacanam*.

(buddhavanta)."84 All this should be known according to grammar.

Ole Holten Pind

Each of the three explanations which Buddhadatta suggests here would seem to depend on Paninian grammar, although it is obvious that he has to some extent reinterpreted the scope of the relevant Pāninian rules so as to justify his grammatical analysis.

[i]

In the first alternative Buddhadatta ascribes a transitive value to buddha. It is clear, that this explanation — illustrated with the quotation of Sn 558 — has canonical support, because the Niddesa, in its comment upon the meaning of the word buddha in Sn 957, uses two nominal derivatives from \sqrt{budh} , with a transitive [+ causative] value, to explain its meaning:

buddho ti ken' atthena buddho? bujjhitā saccānī ti buddho. bodhetā pajāyā ti buddho:85

In what sense is he a Buddha? He is a Buddha because (iti) he [himself] knows the [four] truths, and he is a Buddha because he makes [them] known to mankind.86

In this gloss bujjhitā is a derivative in -tr from \sqrt{bujjh} [< passive stem * \sqrt{budhya} -] to be construed with $sacc\bar{a}ni$ [= acc.], whereas $bodhet\bar{a}$ is an analogous causative derivative [< causative stem \sqrt{bodhe} -] in -tr, to be construed with saccāni [= acc.] and pajāya [= dat./gen.].87

A past participle in -ta = kta is normally not used in the sense of agent kāraka. In Pān III 471, however, Pānini lays down the semantical and syntactical conditions under which this is possible: ādikarmani ktah kartari ca: the suffix "kta" is also used in the sense of the agent, when it is used in the sense of an inchoative action. The Kāśikā illustrates this rule by the following example: prakrtah katam devadattah: Devadatta has undertaken to make a mat. In this example the word prakrtah is in agreement with the agent Devadatta and is therefore, according to Pāninian syntactical theory, used in the sense of the agent. As shown by the example the -ta participle is constructed with the object $k\bar{a}raka$ [= katam]. We find an exact parallel to this syntactical structure in Buddhadatta's initial remarks about the meaning of "buddha": catusaccadhamme [= acc.] buddho ... ti buddho. There is thus no reason to doubt that his analysis presupposes Pāninian grammar.

In the Pāli grammatical literature we find a reflex of this analysis in Kacc [558+] 559 and Kacc-v ad loc.:

budhagamâdyatthe kattari. budha gama icc evam ādīnam atthe tapaccayo hoti kattari sabbakāle, yathā sankhatâsankhate dhamme bujjhati, abujjhi, bujjhissatī ti, buddho. saranam gato, samatham gato iccevamādi.

[The suffix denoted kta is used] in the sense of the agent $k\bar{a}raka$, when [the verbal root to which it is joined] has the meanings of the roots \sqrt{budh} , and \sqrt{gam} , etc.

The suffix denoted kta is used in all times in the sense of the agent $k\bar{a}raka$, when it is joined to verbal roots that have the meaning of such roots as \sqrt{budh} , and \sqrt{gam} . For instance, [the word] buddha: who knows, has known and will know the dhammas that are conditioned and not conditioned. saranam gata: who has found refuge, samatham gata: who has found peace.

This analysis obviously presupposes that in Pāli — as in Sanskrit literature — one finds instances where a -ta participle is constructed with the accusative of goal, as in the above examples from Kacc-v. It clearly must rely on a distinctly Buddhist tradition because there is nothing in Pāninian grammar that justifies the interpretation of buddha and gata in this sense. Buddhapiya may have realised that Kacc departed from the tradition of

⁸⁴ I.B. Horner's translation is based upon a wrong punctuation of the text and thus confuses the point at issue.

⁸⁵ Qu. Patis I 174,7; Vism 209,21; Sadd 481,28; cf. Patis-a 485,5: tattha yathā loke avagantā avagato ti vuccati, evam bujjhitā saccānī ti buddho; yathā panņasosā vātā pannasusā ti vuccanti evam bodhetā pajāya ti buddho.

⁸⁶ Cf.: yasmā vā cattāri saccāni attanā pi bujjhi, aññe pi satte bodhesi, tasmā evam ādīhi kāraņehi buddho [Vism 209,18-20]; yathā loke avagantā "avagato" ti vuccati, evam bujihitā saccānī ti buddho; yathā pannasosā vātā "pannasusā" [cf. Ujjval. ad Unādis II 22] ti vuccanti, evam bodhetā pajāyā ti buddho [Pj I 15,10-13].

⁸⁷ It is noteworthy that Nidd is the only canonical text in which the two terms are recorded. Their formation clearly presupposes more than just basic knowledge of Pāli nominal derivation. Thus, for instance, we cannot exclude the possibility that, for example, the term bodhetar is coined by analogy with Sanskrit bodhayitr.

Sanskrit grammar, because he quotes the illustration of the meaning of buddha in Kacc-v with the remark that the tapaccaya is here used in the sense of the present (ta iti vattamāne), which, of course, reflects Pāninian theory (cf. Pān III 2 188). In the following [Rūp 592 = Kacc 559], however, he quotes a slightly edited version of Kacc-v ad Kacc 559, with the remark that the ta suffix also occurs in the sense of sabbakāla. This clearly has no support in Pāṇinian grammar. Kaccāyana's rule may ultimately derive from a commentarial tradition connecting \sqrt{budh} and \sqrt{gam} , which can be traced back to Buddhaghosa.

In connection with the interpretation of the Buddhist stereotype Bhagavantam saranam gacchāmi, Buddhaghosa suggests taking \sqrt{gam} in the sense of \sqrt{budh} :

yesam hi dhātūnam gati attho buddhi pi tesam attho, tasmā gacchāmī ti imassa jānāmi, bujjhāmī ti ayam attho vutto [Sv 229,22-24 = Ps I 131,4; qu. Nidd-a 442,6].88

Because (hi) the verbal roots that have the meaning of movement also have the meaning of understanding, $(tasm\bar{a})^{89}$ the [word] gacchāmi is said to have the meaning "I know", "I recognize".

A Sanskrit verse ascribed to a certain Rāhulapāda by Prakramabāhu II in Vism-sn 479,19-20 evidently reflects the same tradition, although it has not been possible to trace the discussion to any known Sanskrit source:

budha ity avagamane yo dhātuh paripathyate yatas tajjñaih, gatyartha ity ato 'smāt kartary api yujyate 'yam ktah.

Since (yatas) the verbal root \sqrt{budh} is enumerated [in the dhātupātha] by those who know it, in the sense of understanding (avagamane), 90 (atas) the kta suffix [=-ta] is also correctly used (yujyate), in the sense of the agent

[kāraka, i.e., in an active sense] after [the verbal root \sqrt{budh}] when it has the meaning of movement.

It is no doubt the affinity between \sqrt{budh} as defined by $ava + \sqrt{gam}$ and the fact that Pānini in III 4 72 ascribes an active meaning to kta when attached to verbs expressing movement. This may very well have suggested the particular treatment of buddha in the grammatical literature.

Rāhulapāda is not known from other source. His date and the nature of his work therefore remain uncertain. There is no doubt, however, that Buddhadatta has based his analysis on a similar tradition. Since there is a striking similarity between Buddhadatta's text and a text dealing with the same topic, which Aggavamsa quotes in Saddanīti [see below], there is reason to believe that Buddhadatta has utilised material from a Pāli source which may well be a post-Kaccayana source.

[ii]

Buddhadatta's second alternative, according to which "buddha" has an passive value (kamma), would also seem to be supported by Pāninian grammar. In Pānini III 4 [69 +] 70: tayor eva krtya-kta-khalarthāh: [the suffixes whose meaning is denoted by] "krtya [= -tavya, -anīya and -ya]," [the suffix whose meaning is denoted by] "kta = -ta" and [the suffix whose meaning is denoted by "khal" are only used in the sense of these two [i.e. action (= $bh\bar{a}va$) and object $k\bar{a}raka$ (= karma)].

According to Pāninian grammatical theory, a -ta participle is used in the sense of the object $k\bar{a}raka$ when it occurs in a passive construction, in agreement with the [theoretical] object, which itself is identical with the grammatical subject of the sentence. The example used by the Kāśikā for illustrating this particular syntactical function of "kta" [ad loc.]: ktah karmani: krtah kato bhavatā "a mat [= karma] is made by you," shows clearly the theoretical presupposition that underlies Buddhadatta's explanation: in the same way as the word krtah qualifies the object katah as made by someone, the word buddha qualifies the object Buddha as recognised by gods and men (devamanussehi), and therefore it can be interpreted as the object kāraka.

There is reason to believe that Buddhadatta's explanation is based upon a source which was also known to Aggavamsa. In Saddanīti he refers to the view of certain [grammarians?] according to whom the formation of "buddha" can be interpreted in terms of the object kāraka. In support of this

⁸⁸ Cf. Pațis-a 485,25-26: gamanatthānam dhātūnam bujjhanatthattā, bujjhanatthâpi dhātuyo gamanatthā honti tasmā ...

89 tasmā is to be construed with $hi = yasm\bar{a}$.

⁹⁰ This is a reference to sa-Dhatup I 911: budhá avagamane.

theory, he quotes a text which is almost identical with Buddhadatta's explanation. It is therefore reasonable to assume that Buddhadatta and Aggavaṃsa utilised the same source:

keci pana kammena⁹¹ pi buddhasaddassa siddhim icchantā evam nibbacanam karonti: sammāsambuddho vata so Bhagavā ti adhigatagunavisesehi khīnâsavehi bujjhitabbo ti buddho ti [Sadd 482,1–4]

Some [grammarians?], however, taking the formation of the word "buddha" in the sense of the object $[k\bar{a}raka,$ i.e. in a passive sense], analyse it as follows: buddha means that he should be recognised $(bujjhitabbo)^{92}$ by those persons whose defilements have been annihilated and who have obtained distinctive qualities, in the words "the Bhagavan, indeed, is fully awakened"!

Unfortunately it has not been possible to trace the quotation to the work from which it was taken. It therefore remains unclear whether it is a purely grammatical source — which Aggavaṃsa's way of quoting it would indicate — or whether it is an unknown piece of canonical exegesis. If it should be the latter, it must be fairly late because Buddhadatta is the only Pāli commentator to mention it. In similar contexts in Vism, Paṭis-a, etc. we find nothing of the same nature. It probably stems from a Pāli source. If this were not the case, Aggavaṃsa surely would not have failed to identify it. It is remarkable that he does not refer to Bv-a [quoted in several places in Sadd], since he is concientious in supporting his grammatical statements with quotations from the cts and ṭīkās.

The last alternative would seem to be based upon an extension of the scope of $P\bar{a}n \ V \ 2 \ [94+] \ 127$: $arśa-\bar{a}dibhyo'c$: the [taddhita] affix $ac \ [=-a]$ is [used in the sense of the suffix denoted matup, i.e. in the sense of "whose it is" or "in which or in whom it is"] after [the class of words $= \bar{a}krtigana$] beginning with arśah. We can safely assume that Buddhadatta had this particular sūtra in mind because Mahānāma, in a context where he addresses

the meaning and derivation of the word *buddha*, supplies us with the information necessary for identifying it. We find the text in Pațis-a 486,20-22, which was quoted verbatim by Upasena in Nidd-a 442,33-443,2. The text reads:

buddhi, buddham, bodho ti paryāyavacanam etam. tattha yathā nīlarattagunayogā "nīlo paṭo," "ratto paṭo," ti vuccati, evam buddhigunayogā "buddho" ti ñāpetum vuttam hoti [= Pj I 16,2–5].

"buddhi, buddham, bodho" are synonyms. In that case, just as one says that a piece of cloth is blue or red on account of the blue or red quality inherent⁹³ [in it], so on account of the quality of illumination inherent [in him], the word "buddha" is used to denote [him as "Buddha"].

The idea is basically the same. The only difference is that this text is sufficiently explicit to identify the relevant grammatical context. Among the words included in the *ākṛtigaṇa* to which Pāṇini refers, are words denoting colour (vaṛṇa),⁹⁴ which is reflected in the two examples used by Mahānāma. The idea that the possessive suffix matup is deleted from words denoting colour goes back to Kātyāyana's vārttika 3 (guṇavacaṇebhyo matupo luk) on Pāṇ V 2 94.

2 [Bv-a 67,33–68,2]

This etymology of the word $br\bar{a}hmana$ [$< brahma + \sqrt{an}$] is basically the same as the one that occurs in Buddhaghosa's cts. Buddhadatta has only inserted the reference to the grammarians' view to complement Buddhaghosa's explanation:⁹⁵

⁹¹ The reading *kammena* is problematic. It might be suggested that *kamme* [loc.] is read for *kammena* which is difficult to construe.

⁹² The presence of the *kṛtya* form [= ger.] of \sqrt{budh} would seem to be an allusion to the Pāṇiṇian rule in Pāṇ II 4 70 quoted above.

⁹³ The term yoga, evidently, belongs to the philosophical context of Nyāyavaiśeṣika ontology; cf., for example, Vātsyāyana ad Nyāyasūtra II 2 61: yogāt — kṛṣṇena rāgena yuktah śātakah kṛṣṇe ity abhidhīyate.

⁹⁴ Cf. Kāśikā ad Pān V 2 127.

⁹⁵ Cf., for example, Sp 111,12–15 = Sv 244,10 = Ps I 109,23: brahmam anatī ti brāhmano, mante sajjhāyatī ti attho, idam eva hi jātibrāhmanānam niruttivacanam, ariyā pana bāhitapāpattā brāhmanā ti vuccanti.

brāhmano ti brahmam anatī ti brāhmano, mante sajjhāyatī ti attho. akkharacintakā pana brahmano apaccam brāhmano ti vadanti. ariyā pana bāhitapāpattā brāhmano ti vadanti.

brāhmana means one who recites (anati) brahma [=bráhman = brahmana] the sacred scriptures, i.e., the Veda], that is, he studies the scriptures (mante). The grammarians, however, explain that $br\bar{a}hmana$ means a descendant (apaccam) of a brahmin [=brahmán]. The Buddhists ($\bar{a}ry\bar{a}$) on their side claim that he is a $br\bar{a}hmana$ because he keeps away from $\sin(b\bar{a}hitap\bar{a}patt\bar{a})$.

It is not possible to decide which tradition the first etymology belongs to. It probably stems from the commentarial tradition of the Atthakathâcariyas. The last one, however, has canonical precedents. 96 It only makes sense in a context where the actual pronunciation of the Pāli consonant cluster br- in brāhmaṇa was b- as recorded in the reading baṃhaṇa of the Aśokan inscriptions. There is no problem in identifying the grammatical reference, which is to Pāṇ IV 1 [83+] 92 defining the formation of patronyms: tasyâpatyam: [the suffix denoted an, etc. denotes] someone's descendant. In the present case the vrddhi formation brāhmaṇa is covered by the scope of the suffix an.

3 [Bv-a 89,16-18 ad Bv II 47]

This remark about the case syntax of the preposition *anu* can only be understood in the light of the similar analysis in Bv-a 238,32-35 [see § 6 below].

anuyanti tathāgatan ti tathāgatassa pacchato yanti. [so punctuate] anuyoge sati sāmi-atthe [so read; Ee -attho] upayogavacanam hotī ti lakkhaṇam.

[The sentence] "They follow after the tathāgata" means they follow behind the tathāgata. When *anu* is used in composition the acc. is used in the sense of the genitive. This is the rule.

There is no rule that justifies Buddhadatta's claim that anu governs the acc. in the sense of the genitive. Such a remark is absent from the analogous analysis in Bv-a 238,32-35, and one cannot therefore exclude the possibility that it stems from Buddhadatta himself. He may have based it upon the fact that pacchato, in the paraphrase tathāgatassa pacchato yanti, is to be constructed with the genitive. As it appears from the way in which the problem is formulated, Buddhadatta deals with the syntactical and semantical properties of the so-called karmapravacanīyas [cf. Buddhaghosa on itthambhūtakkhyāna, q.v. supra; cf. Bv-a 238,32-35 ad Bv XX 5, q.v. infra].

4 [Bv-a 114,12-13]

In this case Buddhadatta deals with the well-known fact that the word aññatra [= Sanskrit anyatra] is constructed with the ablative.

n' atthi aññatrā ti aññatralakkhaṇam saddasatthato gahetabbam tato dasa pāramito añño buddhakārakadhammo n' atthī ti attho.

[As regards the clause] "there is no [other] except ...," the rule concerning the word except (aññatra) should be sought in grammar. The meaning is that there is no other norm that creates a buddha, than the ten pāramitās.

It is not clear what rule of grammar Buddhadatta has in mind. In the Pāṇinian tradition there appears to be no explicit rule about the case with which Sanskrit anyatra is to be constructed. There is reason to believe, however, that Buddhadatta is thinking of Pāṇ II 3 [28+] 29: anya-...-yukte, in which Pāṇini lays down the rule that a noun, when constructed with anya, is put in the ablative. Buddhadatta's own paraphrase [with añña + abl.] supports the assumption. He presumably extended the scope of the Pāṇini sūtra so as to cover the usage of añħatra, which is treated as a substitute form for the locative. Aggavaṃsa is apparently the only Pāli grammarian to formulate a rule for the case syntax of añħatra: añħatrayoge paħcamī tatiyā ca: the ablative and the instrumental are used in construction with añħatra [Sadd 703,22].

⁹⁶ For references, v. PED s.v. ¹bāheti.

5 [Bv-a 173,21–24 ad Bv]

In this short remark Buddhadatta focuses on a peculiar grammatical construction where an action noun (dassana) is to be constructed with a nominal in the accusative:

dassanenā pi tam buddhan ti tassa buddhassa dassanenā pī ti attho. īdisesu pi sāmivacanam payojenti (Be payujj-) saddaviduno (Be saddasatthavidū).

By seeing the Buddha: The meaning is "by the sight of the Buddha". In such cases, however, the grammarians use the genitive.

It is not normal practice in Pāli or Sanskrit to construct an action noun with the accusative. In such a case one would normally expect the genitive (genitivus objectivus) of the nominal that is syntactically dependent on the action noun. The grammarians to whose usage Buddhadatta refers are no doubt, in this as in other cases, identical with the Pāṇinians, because Pāṇini addresses this usage in Pāṇ II 3 65: kartṛkarmaṇoḥ kṛti: when used with a word ending with the suffixes denoted kṛt [i.e. primary derivatives], [the genitive] is used in the sense of the agent [kāraka] or the object [kāraka].

6 [Bv-a 238,32–35 ad Bv XX 5]

In this text Buddhadatta deals with the syntactical peculiarity of the *karmapravacanīya anu*.

tattha caturāsītisahassāni sambuddham anu pabbajjun ti tattha anunā yogato sambuddhan ti upayogavacanam katan ti veditabbam. sambuddhassa pacchā pabbajimsū ti attho. lakkhaṇam saddasatthato gahetabbam.

In this case one should know that in the verse "eighty-four thousand who had gone forth after The fully Awakened One," the [word] "sambuddham" is put in the accusative because it is constructed with "anu". The meaning is "they went forth

after the Fully Awakened [had gone forth]". The rule is to be sought in grammar.

Buddhadatta deals here — like Buddhaghosa in connection with his analysis of the verb abbhuggacchati [v. supra] — with the linguistic category karmapravacanīya. Pāṇini deals specifically, in Pān I 4 84: anur laksane, with the usage of anu when used in the the sense of a sign (laksane). The idea is that the thing denoted by the word governed by anu, assumes the function of the cause of the verbal action. Consequently anu means "after" in a logical sense, i.e. in the sense of "as a consequence of", or "because of." It is, of course, debatable whether Buddhadatta is correct in assuming that anu has this specific force in the verse upon which he comments. However, the relatively few occurrences of the verb anupabbajati in Pāli would seem to suggest — in contrast to the usage of abbhuggacchati — that we interpret anu in the sense of a karmapravacaniya, although its usage in the Pāli is not absolutely parallel to the usage defined by Panini. In the Pali it is questionable if anu can be treated as syntactically disjoint from the finite verb. For instance, in Vin II 180,6: Sakyakumārā bhagavantam pabbajitam anu pabbajjanti, it would seem to be treated as an ordinary preposition constructed with a noun in the accusative (bhagavantam), in agreement with an explicit not finite verb-form (pabbajitam). On the other hand, the Pāli grammatical literature would seem to be correct in ascribing a causal function to anu in this particular context: Sakyakumārā went forth after [= because] bhagavan had gone forth. Kacc-v ad Kacc 301: kammappavacanīyayutte uses an analogous canonical example for illustrating the rule about kammapavacaniya: pabbajitam anu pabbajimsu [= D II 30,11] = Sadd 716.13 (§ 586).

Buddhadatta noticed that the pp. pabbajitam was absent in Bv, and he found a justification for its absence in the grammatical literature. It is not possible to decide whether Buddhadatta relied upon a distinct Pāli grammar, but the nature of his analysis and the context in which it occurs makes it reasonable to assume that he knew Kaccāyana's grammar and the commentarial tradition attached to it. The example chosen by the authors of the vutti in this particular instance is not merely a Pāli reproduction of an example taken from a Sanskrit grammar but is distinctly canonical, and its presence in Kacc-v would seem to indicate that we are dealing with a tradition which aimed at illustrating the rules of Pāli, not merely by means of Pāli translations of examples taken over directly from Sanskrit grammar, but

through genuine canonical quotations. This tendency reached its peak with Aggavaṃsa, who is claimed, by the author of the Kaccāyanavaṇṇanā, to have based his grammar on the Pāli.⁹⁷

PĂLI LEXICOGRAPHICAL STUDIES VII¹ FIVE PĂLI ETYMOLOGIES

Here is another random collection of words which are either omitted from PED,² or given an incorrect meaning or etymology there.

- 1. gandhana "harming"
- 2. pāreti "to be successful"
- 3. marissa "going to die"
- 4. vivicca-sayana "a secluded lodging"
- 5. sosinna "very wet"/sosīna "very cold"

1. gandhana "harming"

In his investigation of the phrase *vāntam āpātum* "to drink one's vomit",³ Alsdorf mentioned the Pāli word *gandhana* found in the compound *kula-gandhana* at It 64,9:

atijātam anujātam puttam icchanti paṇḍitā, avajātam na icchanti yo hoti kula-gandhano.

"Wise men desire a son of higher birth or equal birth; they do not desire a son of lower birth, who harms the family".

Journal of the Pali Text Society, XIV, 219-25
